

The Devonshire

Imagery Homes is proud to offer the Devonshire, a Craftsman Style split bedroom ranch with 2,863 square feet of living space. The rich exterior finishes include stone, cedar shake shingles, and decorative gable brackets.

You are welcomed through an inviting covered entryway into a dramatic foyer with its 12' ceilings and arched top transom window. Beneath your feet you will find hardwood flooring that extends from the foyer into the dining room, kitchen, and dinette.

Just off the foyer is an elegant dining room with a 11 foot high coffered ceiling, crown moulding, built-in china cabinets, and a butler's pantry with granite counter tops.

From the foyer, you enter the impressive great room through an arched opening that reveals the 12' high ceiling, large windows with transoms, gas fireplace, and built-in maple cabinetry.

The kitchen and large dinette feature maple cabinets with a distinctive crown moulding, wraparound snack bar, work island, large walk-in pantry, built-in appliances and granite countertops. Off the kitchen is a large dinette with cathedral ceilings and large floor to ceiling windows.

The master bedroom has an 11' coffered ceiling, crowned moulding, and his and her walk-in closets with built-in shelving. The luxurious master bath has a large whirlpool tub, oversized walk-in tile shower, his & her vanities with quartz countertops, and ceramic tile flooring with a radiant floor warming system.

A spacious utility room contains a built-in sink, maple cabinets for added storage. The mud room is conveniently located off the garage and includes a large coat closet, storage lockers and ceramic tile floors.

It is the mission of Imagery Homes, to provide its customers with distinctive high quality homes. This is evident with the exceptional finishes and quality construction found in the Devonshire.
